NUIT DE LA GLISSE

4K CINEMA FEATURE FILM - 90'

Stories centered on the Human Experience: the connection with nature through the extreme sports in which the athletes have evolved.

To exist in today's world, we often have to keep up with a frantic pace, leaving little time for things that are non-essential but vital to our balance.

Against this trend, some humans do not accept these constraints and have chosen to live in connection with nature.

This choice imposes a rapid adaptation, a deep respect and a great knowledge of the elements.

This is their art of living, adapting to fully integrate into the environment in which they evolve.

The story of two years of filming in British Columbia, in the French Alps, in Norway north of the Arctic Circle, and in the Cenotes of the forests of Mexico.

## NDG CINEMA - LA NUIT DE LA GLISSE

### 5 DECADES OF HISTORY

---

With almost half a century in outdoor movie production, NDG Cinema has become the reference when it comes to extreme sports movies. Cutting edge shooting technics combined with world-class riders are the key ingredients to our long-term success.

Nuit de la Glisse was born during the 70's by a group of inspired visionaries, giving birth to a true social phenomenon, today known under the French term «Glisse».

Today, 'NDG Cinema' is the new name for 'Nuit de la Glisse' international film label. It embodies the origins of this trend, and have evolved over the last 5 decades to encompass newly emerging action outdoor sports, while at the same time, documenting the amazing and exciting developments in our original passions, surfing and snow sports. By gathering together all the different sports fans to one common and unique events for the last 50 years at cinema halls across the world, NDG Cinema has positioned itself as a legitimate and recognizable brand.

#### WORLDWIDE DIFFUSION:

While our movies are all shot for cinema with high quality standards and distributed worldwide, NDG has recently opened to new distribution channels such as VOD (ex. Netflix) and TV (Direct TV, CCTV China, France Télévision...). Today, our contents are distributed in over 20 countries and reach millions of people every year.

## THIERRY DONARD

### FILMMAKER

---

Thierry Donard is above all a passionate and professional filmmaker.

He has always been fascinated by extreme sports. In the 70's, when he was only 13 years old, Thierry made his first ski film. In 1978, he met Dick Barrymore, an American filmmaker and pioneer of action sports cinema in the United States, who changed his life. He joined his team and worked alongside him for 10 years.

In 1996, he (re)launched the series «Nuit de la Glisse» with the intention of extending his films to cinemas and consolidated his project. His films are now part of one of the largest European extreme sports labels with the largest distribution network across Europe.

The film production company he manages has produced over the last 10 years an impressive number of documentary films that belong to a real broadcaster category (Extreme Adventure / Documentary).

In nearly 50 years, all the biggest names in extreme sports have appeared in front of Thierry Donard's cameras.

# HUMAN EXTREME

---

## OUR VALUES

---

### ECO-RESPONSIBLE VISION OF THE DIRECTOR

Thierry Donard leads a team of extreme filmmakers, ready to sacrifice anything to bring back unique footage.

After many years exploring the world, we have witnessed and realized the consequences of climate change. Our goal now is to find extraordinary Freeriders, to follow their adventures, to create admiration among our public, and to influence our state of mind towards Nature.

We will always keep a positive message, showing the beauties of our world and how to appreciate these, and keep pushing the limits of what athletes can accomplish while facing the forces of the elements.

# HUMAN EXTREME

---

## OUR MOTTO

### EXPLORE THE WORLD

To admire and to share through our images the beauty of nature and to testify a global climate change and to drive our audience towards an awareness-raising through a legitimate message.
